Payment reference: „Finsterwalder Kit“ and your Name

How to REPLACE the Finsterwalder faulty BUCKLES on your Icaro harness with T-LOCK strap system

This is how you REPLACE the SAFE-T STRAP connected to one of the leg straps.

Before proceeding, make sure the buckles of the provided kit are the same as the ones on your harness.

Cut the loop of the safe-T strap without damaging the leg strap.

TAKE THE NEW SAFE-T STRAP provided by Icaro

PASS THE BUCKLE of the leg strap
THROUGH THE LOOP of the new safe-
T strap.

POSITION the leg strap at the VERY
END OF THE new safe-T strap LOOP
and then BEND THE SHORT VELCRO
BIT OVER the new safe-T strap.

BEND THE LONG VELCRO BIT OVER
the short one so that the leg strap is
HELD FIRMLY at the very END OF THE
new safe-T strap LOOP.

TURN THE ELASTIC SHEATH INSIDE
OUT and PLACE IT OVER THE VELCRO
to secure the new safe-T strap.
